

Care Guide

Wash and Care Instructions

First Initial Wash - Mother ease recommends to prewash your diapers once before using them with hot water and detergent. During this prewash, wash no more than 8-10 diapers at a time in order to minimize lint accumulation.

Soiled Cloth Diapers

1) Wet cloth diapers go directly into the diaper pail, no rinsing necessary. Soiled cloth diapers are rinsed in the toilet, then put into the diaper pail. Mother ease offers a diaper sprayer that attaches to your toilet to simplify rinsing. Review this product in our shopping section under "Diapering Accessories".

2) When the pail is full, dump the cloth diapers directly into the washing machine.

3) Pre-rinse or do a short cycle with warm water and detergent. Use the detergent you use for the rest of your laundry (without bleach). Avoid the use of fabric softeners.

4) Wash the cloth diapers in a full cycle, at highest water level, using HOT water, and your household detergent (without bleach). Bleach is very harsh against your baby's skin and may damage the cloth diaper's fibers, elastics and covers.

5) The washed diapers may either be line dried or dried in the dryer (avoid the use of dryer sheets).

Soiled Diaper Covers - Hand or machine wash with your diapers using laundry detergent and line dry or dry in the dryer. Close Rikki covers and turn inside out before washing or drying.

Helpful Tips

Diaper Stains - Rinse soiled diapers promptly in the toilet using a diaper sprayer to minimize stains. Flushable Diaper Liners will also help. Should you have a tough stain, apply Country Breeze Stain Remover or Laundry Magic directly to the stain and gently rub until the stain has lifted. Repeat if necessary.

Flushable Bamboo Liners - To simplify the clean up of soiled diapers, flushable bamboo liners can be laid into the diapers.

Creams - Sticky barrier creams used to help prevent diaper rash can leave residues making diapers water repellent. Flushable Bamboo Liners will help prevent residue from accumulating on diapers.

Diaper Rash - A number of factors can cause diaper rashes. The first thing to try is more frequent diaper changes. Should the problem persist, run another final rinse cycle and add a cup of white vinegar.

Night Time Diapering - For babies over 6 months, add 1 absorbent liner for night and nap time. For babies under 6 months, an absorbent liner is not needed.

Exchange & Return Policy

Please visit <https://mother-ease.com/pages/shipping-returns> for detailed information regarding exchanges and returns.

Bedwetter & Training Pants - Turn inside out to expose cotton for laundering. For best results, rinse the Bedwetter Pant every morning.

Swim Diapers - Hand wash in warm water and line dry. Do not wrap wet swim diaper in towel. Garment may bleed color.

Breathable Diaper Pail Meshes and Wet Bags - Wash in hot water and detergent before use. Color may bleed with blue and red pail mesh bags.

Storage Methods

Dry Pail System - Most Convenient

Place Mother ease Breathable Mesh Pail Bag into diaper pail (optional for front loading machines), add used diapers (soiled diapers are first rinsed in toilet). When ready to launder, lift the mesh bag out of pail and toss into laundry machine. Be sure to open the bag so that the diapers can work their way out during the wash cycle.

Wet Pail or Pre-Soak System - Best for Reduced Staining

Place Mother ease Breathable Mesh Pail Bag (optional for front loading machines) into diaper pail, add water and a teaspoon of detergent and fill to desired level (optional). Place used diapers into pail and let soak (soiled diapers are first rinsed in toilet). When ready to launder, lift the mesh bag out of the pail and place over or near a drain, eg. tub or laundry tub. Empty the remaining water from pail. When most of the water has drained from the bag, toss into washing machine, making sure to leave the bag open so the diapers can work their way out during the wash cycle.

Laundry Detergent Disclaimer

Mother ease does not recommend homemade detergents. Fat deposits from soap can accumulate in the diapers' layers and cause water repellency.

Mother ease also does not recommend the use of boutique type detergents due to customer complaints. These include but are not limited to: Charlies Soap, Allens Naturally, Nellies Soda, Rockin Green, Country Save, Laundry Tarts, any type of Soap Nuts, 7th Generation Soap and Ecos.

Do not use laundry detergent products containing sodium percarbonate, hydrogen peroxide (oxygen bleach) or optical brighteners. These ingredients are often listed. When combined with uric acid and ammonia a reaction occurs causing natural fibers to dissolve. These ingredients are also harsh on diaper covers and cover binding.

Warranty

We are pleased to provide durable, well-designed cloth diapers, diaper covers and diapering accessories.

Please visit www.mother-ease.com/warranty for detailed information regarding our warranty.
